

A

Overview of the excavation area and upper levels.

B

Excavator exposing a well-preserved deer antler.

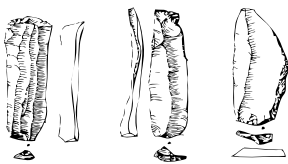

C

Examples of Levantine Aurignacian bone and antler points.

D

The skull of seven-year-old Egbert, as found during excavation.

E

Initial Upper Paleolithic (IUP) blade tools include chamfered pieces and burins, or chisels.

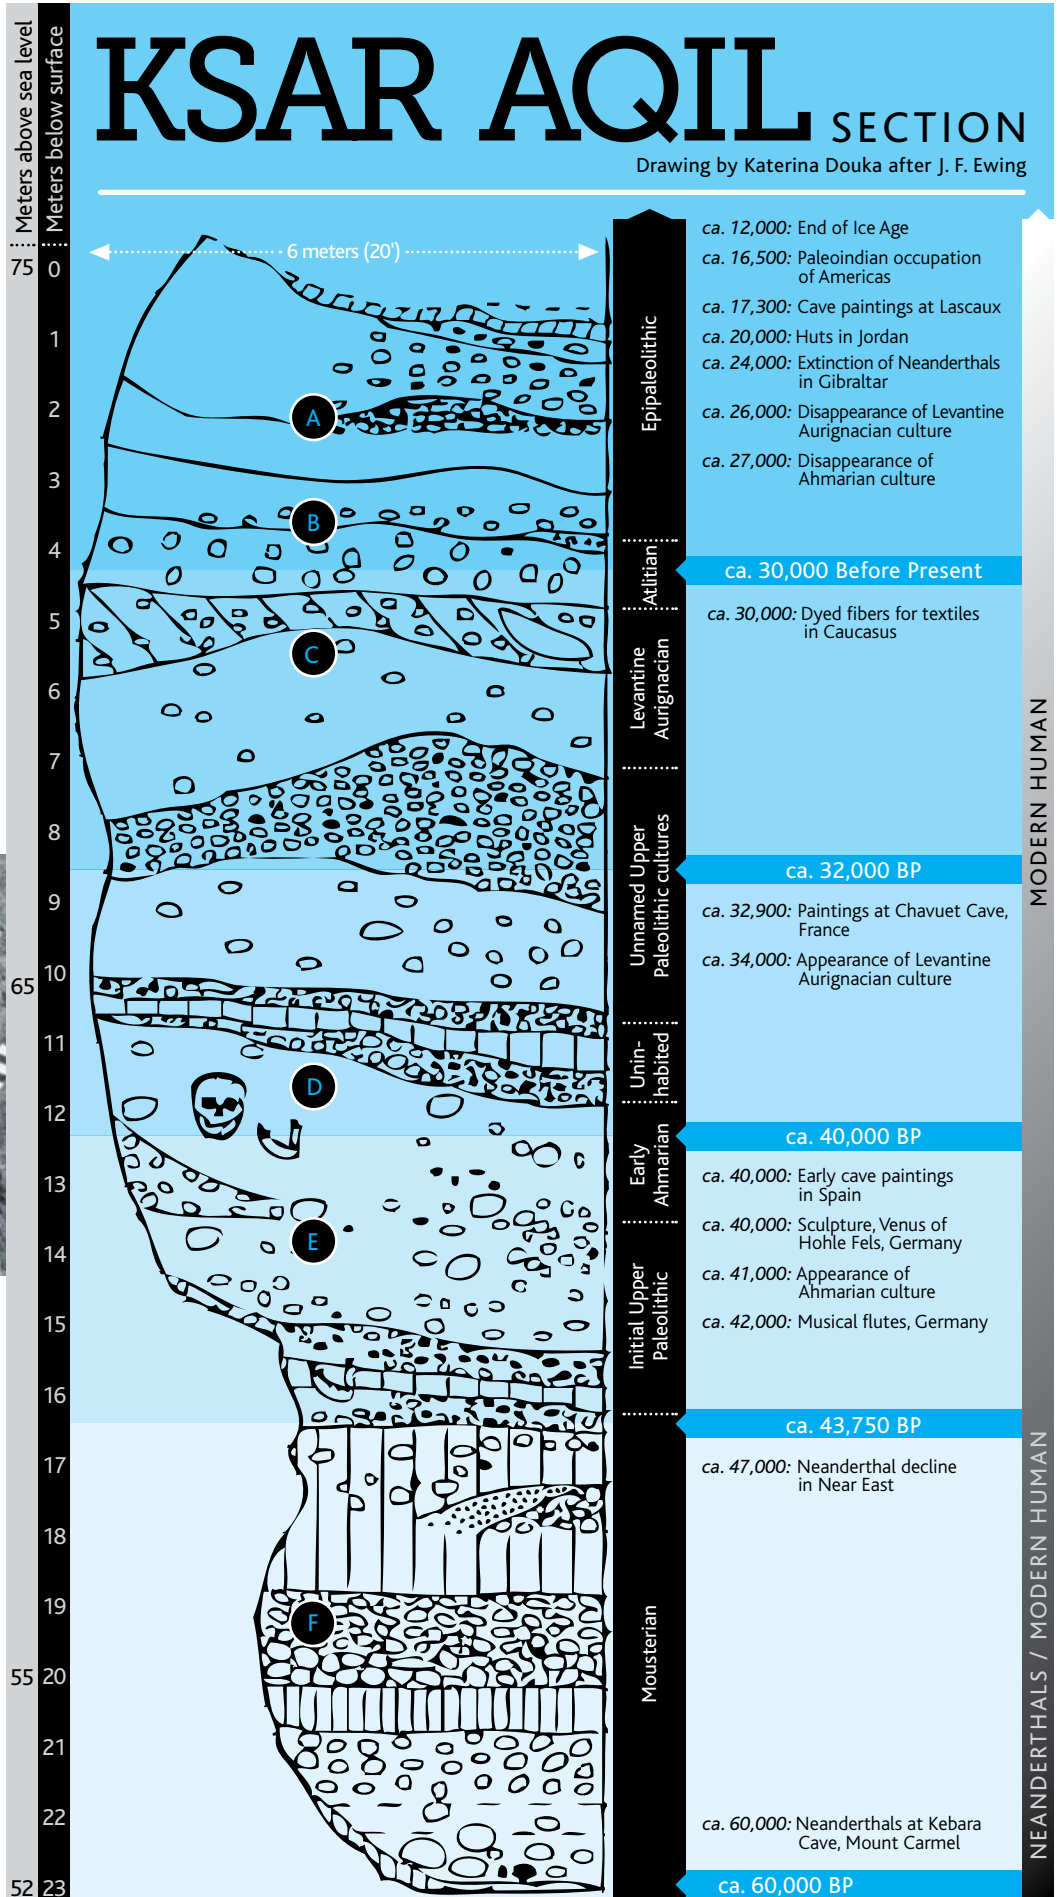

F

The excavation team reaches approximately 19 meters (62') in depth.
